## **Claim or Claims**

What I claim as my invention is Mat Covering.

Mat Covering is a fabric-covering for a mat to keep children from lying directly on a vinyl mat.

The uniqueness of the invention Mat Covering is Mat Covering stays on the mat even during nap time and other activities. The Mat Covering is enclosed around the mat, therefore, the mat is always covered, but the covering is not permanent. It is removable when it is necessary to launder it.

Mat Covering is exclusive as there are no other similar products of its kind and uses invented.

Since Mat Covering has a variety of closures; its practical application is a closing with a button, hoop and loop fastener, or just left opened.. Several designs: drawing #1, drawing #2, and drawing #3 are open.
